

“The Works” Service Definition

“The Works” is our most comprehensive service package. For this we strip down the whole bike, fully clean and degrease the entire bike and transmission, replace worn or damaged parts and then reassemble, lubricating as we go. The Overhaul is fully comprehensive, which means we delve right inside the machine including wheel and headset bearings on all bikes. The price includes a full “Bike Valet”

The work that we carry out is detailed below.

Frame & Forks

Frame cleaned and checked for alignment and damage, threads cleaned and checked
Frame and Disc mounts faced (if applicable)

Wheels

Hubs and rims checked for damage and wear
Hubs disassembled, cleaned, inspected and reassembled
Bearings checked for free movement and adjusted or replaced*
Wheels trued and spokes retensioned

Tyres

Tyres and sidewalls checked for wear and inflated to correct pressure

Headset

Removed, cleaned, re-greased (if applicable), refitted & checked for movement (replacement fitted if necessary)*

Bottom Bracket

Removed, cleaned, re-greased (if applicable), refitted & checked for movement (replacement fitted if necessary)*

Bolts

Checked and tightened to correct torque

Drive Train (chain and cassette/block)

Removed, cleaned, checked for wear and re-lubricated

Brakes

Checked for effective operation and adjusted
Cables lubricated (replacements fitted if necessary)*

The price of this service includes the fitting of all the most common consumables: tyres, tubes, wheels, all control cables, brake pads, chain, and rear sprockets.

Additional work (e.g. suspension servicing) and fitting of all other parts is charged extra at **half the usual labour rate** for the job. Seized parts may also be surcharged at full price for removal (depending on the labour involved!).

*This price is exclusive of parts.
